

Holiday Parties/Class Treats

Please take these points into consideration as you plan snacks for your child to share at school.

Birthday treats, snacks to share, party-treats and party-games must follow Health Department guidelines.

1. In games avoid actions where body fluids like saliva can be exchanged. (apple bobbing, etc.) You could have an apple for each child on the end of a string.
2. Treats must be sealed individually and purchased from a store. (Little Debbie type things)

Items purchased in a bakery CAN be served by an adult with clean, gloved hands if they arrive at school with the bakery seal undisturbed.

(WE ARE SORRY, BUT NO HOMEMADE ITEMS like popcorn or popcorn balls, cookies, fudge, cupcakes, etc.)

3. Candy must also be single servings sealed at the factory.
4. The best way to do ice cream is to purchase individually wrapped items. Otherwise, it should be served by an adult with clean, gloved hands.
5. Drinks premixed by a dairy or soft drink company are best. If not individually packaged, serving should once again be done by an adult with clean, gloved hands.

At Dunlap Elementary we want to do everything that we can to protect our youngsters, staff, and guests from developing any illnesses. THANKS FOR YOUR ASSISTANCE in this effort.
