

Dear Parent/Guardian:

A registered nurse is available to middle school students on Monday of each week that school is in session. The nurse is available to discuss any health concerns you may have regarding your child. The nurse can be reached by contacting the main office at the middle school @ 961.9784. Her office, however, is located in Dunlap Elementary.

The services provided include the following:

- Direct health care on site, minor treatments, first aid
- Illness, injury assessment and interventions, referrals if needed
- Health education
- Communicable disease referral/education
- Emergency assistance
- Chronic disease assistance
- Case management participation
- Referral to other services
- Immunizations for students and their siblings

All students must be properly immunized. Please contact Karen Lukowski, school nurse, if you would like your child's immunization record reviewed.

**No student may be treated without a signed consent form. Please pick up a Student Health Information/Consent for Treatment form in the middle school main office and return as soon as possible.**

It is our philosophy to provide community based, family centered, and prevention oriented services that promote the health and well being of school-aged children.

Sincerely,

Christina Feneley  
Principal  
Pennfield Middle School
